Problem Statement

Organizations may manage employee records, attendance, leave approvals, announcements, and training through separate tools or manual processes. This can lead to duplicated data, delays, limited visibility, and difficulty tracking requests. StaffSync addresses this problem by providing a centralized system with role-based access for HR, managers, and employees.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A team manager responsible for managing employees	Monitor team attendance, review leave requests, manage training activities, and track employee performance.	Tracking team activities and handling requests manually can be time-consuming.	Employee records, attendance information, and leave requests may not be available in one centralized system.	Overloaded, less organized, and concerned about delays in team management.
PS-2	A team manager responsible for managing employees.	Monitor team attendance, review leave requests, manage training activities, and track employee performance.	Tracking team activities and handling requests manually can be time-consuming.	Employee records, attendance information, and leave requests may not be available in one centralized system.	Overloaded, less organized, and concerned about delays in team management.

PS-3	An HR administrator responsible for employee records and HR operations.	Manage employee information, oversee attendance, process leave requests, publish announcements, and review HR activities.	Maintaining records and coordinating multiple HR processes can become difficult and inefficient.	Manual processes and disconnected tools can lead to duplicated records, delays, and limited visibility.	Stressed, overwhelmed, and concerned about accuracy and efficiency.
